Education

Bachelor of Science (*Computer Science*) –Mehran University of Engg & Tech | Jamshoro, Pakistan. (Jan 2021 – Jan 2025)

- CGPA: **3.33**/4.0 | **Top 7** – Faculty of Computer Science

Core Courses: Object Oriented Programming, Data Structures and Algorithms, Data Base Management System, Computer Organization and Assembly Language, Operating Systems, Data Science, Artificial Intelligence, Deep Learning, Statistics

Professional Experience

Data Science Intern | Intrapreneur | Latifabad, Hyderabad

- Performed data wrangling and visualization for real world businesses datasets, enhancing analytical insights for clients. (Sept 2024 – Oct 2024)
- Collaborated on predictive modelling tasks using Python, improving project delivery efficiency by **25%**.

Web Designer | ACM-W MUET | Jamshoro, Pakistan (Oct 2022 – Oct 2023)

- Spearheaded front-end designs for society events, enhancing user experience across multiple devices.
- Implemented responsive web components, reducing page load times by 30%.

Academic Projects

(FYP) Mine&Find : Mobile-Based Commodity Search & Comparison System | **Full Stack Development** (Aug 2024)

- Developed a web-based marketplace enabling real-time product **search, filtering (category, brand, price, condition)**, and side-by-side comparison of product specifications to assist online shoppers in making informed decisions.
- Built the platform using **HTML, CSS, JavaScript, and PHP**, with **MySQL/Firebase** backend for managing product datasets.
- Optimized database queries and indexing to improve product search efficiency by **30%**, while designing an intuitive **UI/UX layout** to ensure smooth user navigation and a responsive browsing experience.

Medicine Recommendation System | Data Science & Analytics (Jan 2024)

- Created a symptom-based medicine recommender using Flask and scikit-learn, achieving a 90% prediction accuracy.
- Integrated user-friendly web interface for real-time health queries.

RAG Based CSV Analyzer | n8n (Jun 2025)

- Designed a Retrieval-Augmented Generation (RAG) system for document analysis using **N8N**.
- Enabled efficient CSV-based query handling, improving information retrieval by **40%.**

SpendBuddy : Expense Tracking App| Android App Development (Jun 2025)

- Developed an app for personal finance management with real-time expense tracking, category-wise analysis, and interactive dashboards using JavaScript and Firebase.

Awards and Achievements

- Secured **Data Science Internship** at **Intrapreneur**, demonstrating strong analytical problem-solving.
- **Winner**, **AI Chatbot Challenge** – NLP Class Challenge | MUET 2024.
- Recognized for exceptional contributions as **Web Developer** at **MUET ACM-W Chapter**.
- Consistent **top performer** in **Data Analytics** coursework at **Leverify Quest**.

Leadership Experience & Courses

Web Development Lead | MUET ACM--W Chapter | Jamshoro, Pakistan (Nov 2022 – Feb 2023)

- Led a team of 5 in designing and deploying web platforms for student events.

Data Analytics Course – Leverify Quest | Virtual, Pakistan (May 2025 – Jun 2025)

- Completed hands-on projects in **data cleaning, exploratory data analysis (EDA), dashboard creation, and business insights reporting** using **Excel, SQL, and Power BI**, **Looker Studio, DAX,** focusing on real-world problem-solving scenarios.

Skills

Programming: Python, TensorFlow, DAX, SQL, MongoDB, Databases, LLMs, Docker.
Cloud Platforms: N8N, Google Cloud, Make.Com.
Tools & Frameworks: Git, RAGs, NLP, PowerBI, LookerStudio, Advance Excel, Postman API.
Soft Skills: Leadership, Public Speaking, Crisis Management, Team Collaboration.
