Professional Summary

Highly skilled and accomplished Senior Android Developer with 9 years of experience in test-driven development, designing, developing, and delivering cutting-edge mobile applications. Demonstrated expertise in the entire Android development lifecycle, from conceptualization to implementation and optimization. Proven track record of building robust, scalable, and user-centric applications while adhering to best coding practices and industry standards.

As a Senior Android Developer, I am committed to delivering exceptional mobile experiences and leveraging my expertise in test-driven development to drive innovation and excellence in the ever-evolving Android ecosystem.

Technical Skills and Tools

STRONG:

Android	*Java*	*Kotlin*	*Room / Realm*
SQlite	*JSON*	*RestAPI*	*Android SDK / NDK*
OOP	*Google Apis*	*Unit Testing*	*Source Tree / Git*

NORMAL:

Github / Bitbucket	*Architecture and Design Patterns*	*Team Management / Mongo DB*	*Firebase / Firestore*
Scrum / Bitrise	*DI / Clean Architecture*	*Architecture Component/Material Design*	*XML / JetPack Compose*
TensorFlow / Machine Learning	*TDD / MultiModule*	*Rxjava / LiveData/Flow*	*CI/CD*

Key Responsibilities Handled

- Write Unit test and Integration test cases as per requirements and write code. (TDD)
- Developing the Code as per the requirements.
- Handling complex issues.
- Modify existing Apps for bug fixes.
- Analyzing software requirements to determine feasibility of design within time and cost constraints.
- Assigning work to team resources as instructed by the Management.

- Development of complex algorithms as per user needs.
- Store, retrieve, and manipulate data for analysis of system capabilities and requirements.

Project Details

Project 1: Equinox App
Customer: Stella Technology

Description

- Equinox is a Tele-Medicine and Clinical Care Network that enables you to talk to your doctor via video call so you don't have to wait in queue for hours for a simple checkup. You can create appointments for both In Person and Tele-Medicine examination.
- **https://play.google.com/store/apps/details?id=com.stella.phrEasy**

Role: Work independently as Developer
Tools & Technologies: Android,MVVM,ConstraintLayouts.

Project 2: Tap Check App.
Customer: Tapcheck

Description

- Tapcheck is an Employer Sponsored Program. Check with your Employer to see if they have signed up with Tapcheck before downloading this App.
- Write Unit Test as per the Code requirement and use cases.
- Write Integration test for apis using mock Server.
- https://play.google.com/store/apps/details?id=com.tapcheck.tapcheck

Role: Team Member (Developer)
Tools & Technologies: Android ,Beacons,Webview,MVVM,NavigationComponent,Unit Testing.

Project 3: Automate
Customer: Moftak Solutions

Description

- Automate is a solution-based company that works on the concept Internet of things (IOT) of by connecting the Physical world with the Internet.
- https://play.google.com/store/apps/details?id=com.auto.smartautomates&hl=en

Role: Work independently as Developer
Tools & Technologies: Android , IOT , MQTT , Sqlite.

Project 4: Prayer Detector.
Customer: Moftak Solutions

Description

- Prayer Detector is a Component of Salah Keeper App.
- In this project we detect the Prayer of a person that he has Recite its prayer or not or how many rakats he has done in his prayer.
- It's a machine learning project which involves training and detection of prayer positions. In this project we train our model on prayer positions of some people using dataset of different positions.
- And train and test this model and after that using tensor Flow we deploy this model on android phone and pass sensor data to detect whether the person is in namaz or not.

Role: Work independently as Developer
Tools & Technologies: Android , Machine Learning , Python, TensorFlow.

Project 5: Inspection App
Customer: Ranglerz

Description

- In this app you can add property and add inspection on Property.
- Every inspection includes a List of Areas in the house like the bedroom , washroom, garage kitchen etc.
- https://www.amazon.com/Sardar-Khan-Inspection-App/dp/B01IAGHXT6

Role: Work independently as Developer
Tools & Technologies: Android , Sqlite.

Project 6: Oldy Baba App
Customer: Ranglerz

Description

- Oldy Baba, an easy to use and amazing face aging machine on your Android device.

- Age yourself so you look like your parent or grandparent! Add funny glasses and a beard, moles etc.
- https://play.google.com/store/apps/details?id=com.test.oldybaba

Role: Team Member (Developer)
Tools & Technologies: Android , Image Processing , OpenCV.

Project 7: QCS
Customer: Moftak Solutions

Description

- At QCS we provide the care sector's leading compliance toolkits, helping providers to meet care standards with minimal fuss.
- https://play.google.com/store/apps/details?id=com.ukqcs

Role: Team Member (Developer)
Tools & Technologies: Android , Realm, API's , Offline Feature,Webview.

Employers

- Currently Working in Stella Technology, from Jan 2021 as a "Senior Android Developer".
- Worked as a "Senior Android Developer" in Tapcheck from July 2019 to Jan 2021
- Worked as an "Android Developer"in Moftak Solutions from June 2017 to July 2019.
- Worked as an "Android Developer"in Niku Solutions from Mar 2017 to May 2017.
- Worked as an "Android Developer" in Jolta Technologies (Pvt) Ltd from Dec 2016 to Feb 2017.
- Worked as an "Android Developer" in Ranglerz Digital Marketing from Aug 2015 to Nov 2016.

Qualifications

- BSCS from PMAS Arid agriculture University Rawalpindi, in 2014.
- ICS from Indus Group Of Colleges Rawalpindi in 2010
- Matric from Manaar Public School Rawalpindi in 2008.

Personal Strength

- High Grasping Power.
- Keen Intellect.
- Can work under pressure to meet deadlines.
- Flexible team player.
- Team management skills
- Manage Task assignment reports
- Handling complex issues.
