EDUCATION

Bahria University, Karachi Campus (BUKC) | CGPA 3.8 | BSc. Computer Science | ***October 2022 –June 2026***

Relevant Courses *– Computer Programming, Digital Logic Design, Data Structure and Algorithm, Assembly Language, Database Management Systems, Critical Thinking, Object Oriented Programming, Web Engineering,*

Cadet College Petaro (CCP) | 94.94% | Pre-Engineering ***May 2016 – June 2021***

PROFESSIONAL EXPERIENCE

Fiverr | Web Developer | Project: MichaelThal.com | ***January 2025 – May 2025***

• Designed and developed a fully responsive, SEO-optimized personal website for a professional author using WordPress and the Blocksy theme.

• Achieved 95% responsiveness across all devices and improved page load speed to under 2.5 seconds, ensuring a smooth user experience.

• Applied performance optimization techniques, reducing image load size by 40% without compromising quality.

Amazon | Virtual Assistant | ***October 2024 – January 2025***

• Launched and managed a small-scale retail arbitrage business on Amazon UK, sourcing profitable products with ROI up to 20%.

• Conducted product research, and listing optimization using tools like Keepa, and Helium 10.

AutoCAD Designer ***January 2024 – June 2024***

• Created a complete architectural house plan using AutoCAD 2D and 3D, including floor plans, elevations, sections, and 3D visualization.

• Improved drafting efficiency by 30% through use of blocks, templates, and layer management.

ACADEMIC PROJECTS

SmartPOS Web Application

• Designed and implemented a smart POS system featuring real-time billing, inventory, and product management modules.

• Improved transaction efficiency and inventory tracking for small retail businesses through an intuitive, web-based interface.

Stock Price Prediction App

• Developed a stock price prediction app integrating machine learning models to forecast market trends with real-time data visualization.

• Enhanced decision-making for retail investors by providing predictive insights and interactive data dashboards.

CO-CURRICULAR ACTIVITIES

Computer-Aided Design (AutoCAD) course

• Completed a comprehensive Computer-Aided Design (AutoCAD) course, gaining practical skills in 2D drafting and 3D modeling for engineering and architectural applications.

Enablers E-Commerce Business Training Program

• Completed the Enablers E-Commerce Business Training Program, learning product research techniques, market analysis, and strategies for selling diverse products across multiple online marketplaces. Acquired skills in profit optimization, competitive pricing, and identifying high-demand product niches.

HONOURS AND AWARDS

Ranked 2nd in Coding Clash Competition in Bahria University, Received 50% merit scholarship for every academic year in Cadet College Petaro.

SKILLS

Python (Pandas, scikit-learn, Matplotlib), MySQL Database Management, Amazon Product Research (Keepa, Helium 10), Retail Arbitrage & FBA Workflow, Analytical Problem Solving, Client Communication, Project Coordination.
