PROFESSIONAL SUMMARY

Analytical Computer and Information Systems Engineer with a track record of 92% workflow acceleration and 30% better decision making. Skilled in data analysis and ML/AI, driven to create business value through insights.

EDUCATION

NED University of Engineering and Technology — **Karachi, Pakistan**
B.E. in Computer and Information Systems Engineering ***(CGPA: 3.546)*** — *Graduation Date: Sep 2025*

Pakistan International School — **Al Jubail, Saudi Arabia**
Matriculation ***(A1 Grade)*** — *2019*

Pakistan International School — **Al Jubail, Saudi Arabia**
Intermediate ***(A1 Grade)*** — *2021*

SKILLS

Programming & Data Analysis: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, BeautifulSoup), R
Data Visualization: Power BI, Tableau, Streamlit, Matplotlib, Seaborn
Machine Learning: Basic understanding of ML models, NLP, recommendation systems
Tools & Frameworks: Streamlit, Keras, PyTorch, SciPy
Databases: SQL (SQLite, SQL Developer)
AI Tools: ChatGPT, Google AI, automation tools
Soft Skills: Analytical Thinking, Problem Solving, Communication, Team Collaboration, Creativity, Attention to Detail, Self-Motivation

RELEVANT PROJECTS

- **Multiple Disease Predictor – ML Project**
  https://drive.google.com/drive/folders/1ID4g6XRMhrKR4kZBSwvsgwr6l-7a51cP?usp=drive_link
  Developed a disease prediction application using patient data to identify three distinct medical conditions.
- **Personalized Recommendation Food Delivery App**
  https://github.com/Aqsa1211/NED-QuickServe
  Developed a food recommendation app that suggests menu items based on real-time weather and individual preferences,

EXPERIENCE

Data Scientist Intern — **Karachi, Pakistan**
10Pearls — ***June 2025 – August 2025***

Developing an end-to-end AQI prediction system using Python and Streamlit to forecast 3-day air quality from real-time API data, including data cleaning, feature engineering, ML model training, and deployment in a Dockerized dashboard.

Business Intelligence Intern — **Karachi, Pakistan**
NBP Funds Management Ltd. — ***March 2024 - April 2024***

Developed and deployed a user-friendly email automation application, using Python and Streamlit, streamlining the process of sending different customized emails in bulk and saving team's valuable time. The app resulted in a 92% improvement in time savings, reducing the time to send multiple custom emails from an hour to just 5-10 minutes.

Created a "Company Explorer" dashboard using Tableau to analyze the financial data of 200+ companies in order to determine high potential targets for outreach and investment, resulting in faster, more informed decision-making.

Data Scientist Intern — **Jubail, Saudi Arabia**
Pakistan International School — ***Feb 2024 - March 2024***

Analyzed student academic performance data to identify key performance indicators (KPIs) and trends, and created interactive PowerBI visualizations that improved data accessibility for school leadership, resulting in a 20% boost in student outcomes and a 30% increase in data-driven decision-making.
